WHY ARE THERE PROBLEMS WITH SOME TIMBER FLOORS?

Only stable timbers will make decent floors because of environmental issues a lot of forests have been locked up. Stable timbers are extremely hard to get hold of. We buy our timbers different to others. As everyone in the game is aware of a lot of trades people know how to work with timber. When it comes to timber floors you have to know about the timber. We have our own unique system(s) of installation for over concrete slabs, particle board or ply sheets as well as old flooring which we would be happy to discuss with you in greater depth.
