

Garden Gates

Customised designs for courtyards and gardens

Farmweld gates are custom made to our clients specifications. Just as each garden or courtyard is unique, we understand that the gate, like any other piece of furniture, needs to fit in with it's unique environment both aesthetically and practically.

Quality ...

Farmweld gates are made to withstand the daily wear and tear of country life. Although garden and courtyard gates don't need to endure the harsher conditions of main entrance or paddock gates, they still need to be resilient enough to withstand regular use. Quality materials are sourced and through consultation with our clients, we take the time to ensure that the design is suitable for its situation.

"We understand that the gate ... needs to fit in with it's unique environment both aesthetically and practically."

Options ...

Because garden and courtyard gates fit into a unique environment, we offer a number of options to help you create the right gate.

The frame can be:

- square RHS,
- round pipe
- flat steel
- straight or bowed top
- square or rounded corners
- made to whatever height is right for you.

Infills can be either:

- Welded mesh (100x150mm or 75x50mm)
- Vertical bars
- Horizontal bars
- Chain mesh
- Heritage Woven Wire

Decorate your gate with:

- scrollwork
- a 'shepherd's crook' handle
- spears
- wrought iron inserts
- Pressed metal ornaments, e.g. flowers, leaves, grapes, etc.

Design options are drawn up and are emailed or posted to you for approval.

If you have a picture of something you've seen, send it to us and we'll see what we can do for you.

What colours are available ...

Like our larger gates we offer clients the choice of a wide range of powder coat colours, including the Colourbond® range. There are many shades of cream, green, black, etc. so for accurate colour selection we recommend that clients contact **Interpon Powder Coatings** on **1800 630 516** and get a colour chart sent out to them. Check the colours outside in daylight to make an accurate assessment of the right colour.

Farmweld is a family owned and operated business which specialises in custom made gates and stock equipment. The businesses focus is on providing customers with quality products which are built to last. Products are shipped Australia wide with many happy and satisfied customers.
