

Anti-slip cleats
for that extra grip

Improve safety while saving time & money

U-TRED® is an innovative new product that installs in seconds onto all open grid type steps used in the mining, construction and agricultural industries.

The U-TRED® creates revolutionary step definition and features double action anti-slip cleats for that extra grip. With no nuts, bolts or fasteners of any kind, your steps are upgraded instantly.

U-TRED® is a robust steel product, galvanised and powder coated safety yellow, it will not crack or release hazardous splinters inflicting bodily harm as can occur with fibreglass stair treads. Existing anti-slip products such as stair nosings can quickly become ineffective after clogging up... Try a U-TRED® sample pack today... You will be amazed!

Benefits

- Guaranteed to revolutionise your maintenance programme.
- Galvanised for extended wear life against corrosion.
- Renovate old worn steps.
- Installs within seconds.
- Save thousands in inventory costs.
- Save thousands in installations costs.
- One size fits all.
- No additional hardware required.

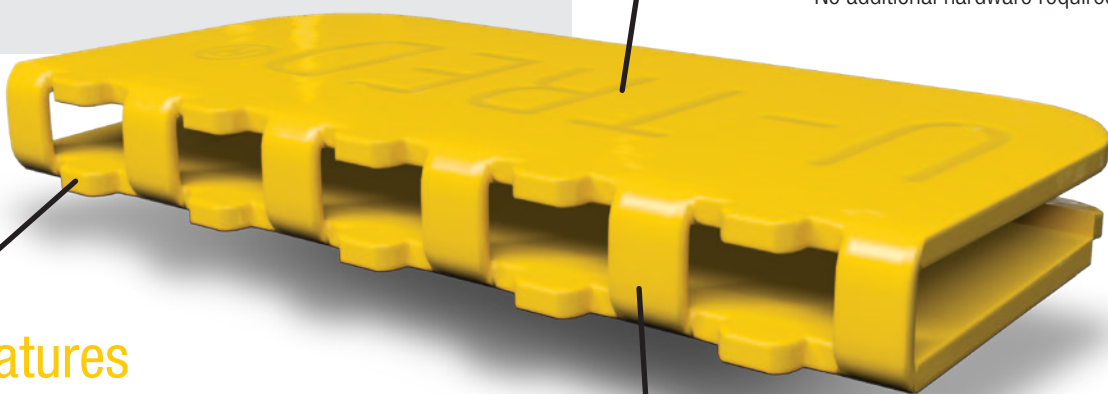

Features

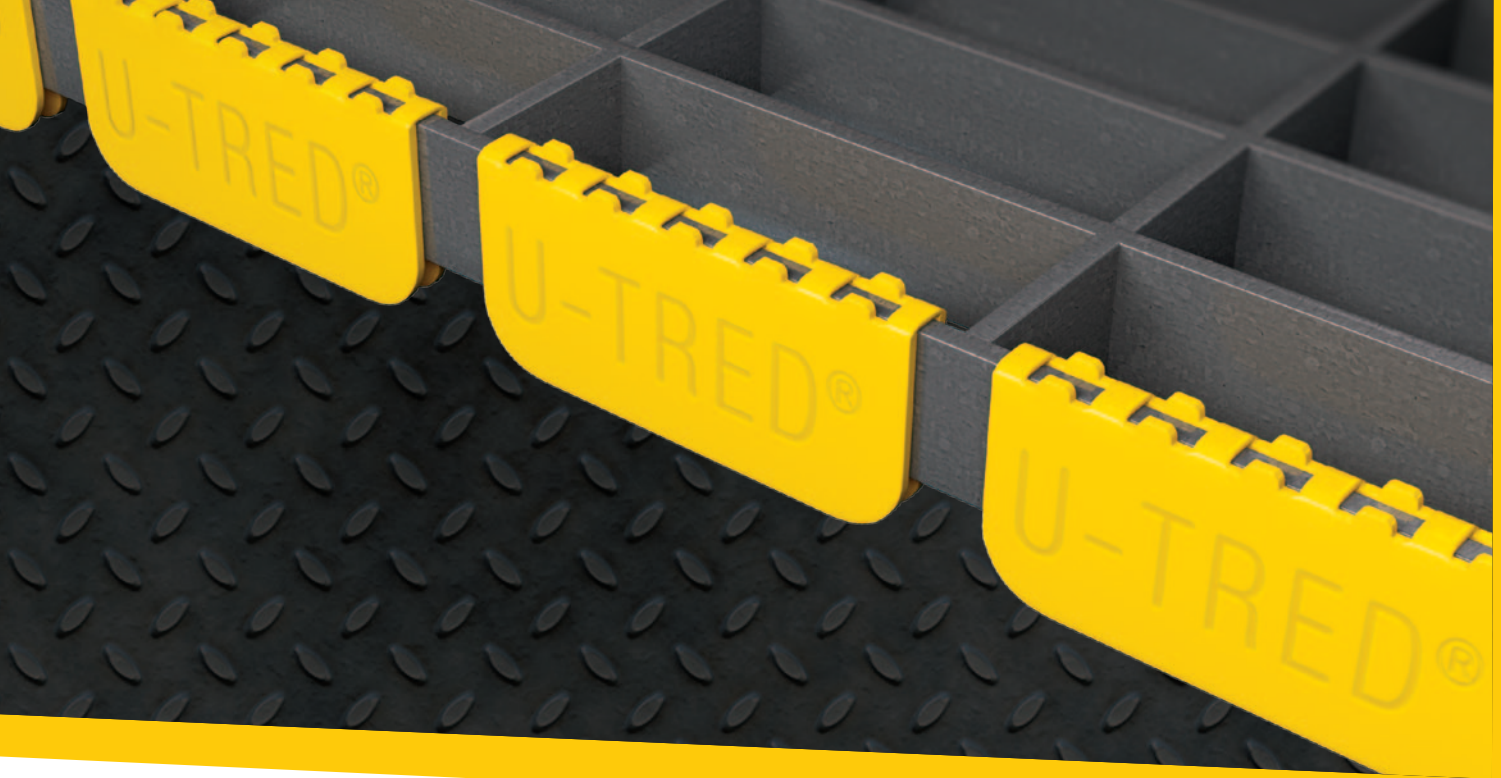

- Fantastic step definition.
- Double action anti-slip cleats.
- 4 self locking barbs to suit 25 x 5mm and 32 x 5mm step edges.
- Flared leading edge to enable fast installation.
- Powder coated in safety yellow to meet industry standards.
- Available in one size 85 x 40mm.

Applications

Suits open type grid steps used in:

- Mining & Construction.
- Oil Rigs & Power Stations.
- Marine & Export Terminals.
- Manufacturing & Processing Plants.

Testimonials

"U-TRED was a very quick and efficient way to fix up the walk ways and stairs on our underground plant." **Adrian Kirkham**, Centennial Coal

"...Prior to discovering the U-Treds we would have had to replace the stairs with new ones which would have stopped our production while we swapped them out."

Adrian Kirkham
Centennial Coal

"The ease in which the U-TRED product is installed, e.g. No drilling and bolting, no lengthy process for Hot Works, e.g. welding in new steps, the U-TRED fits hand in hand with our site hazard observation programme."

Rodney Sutton
Carter Holt Harvey Wood Products

"They are a great product. The employees install them and say they look neat & tidy. Have installed 1000 at present with more to purchase & install."

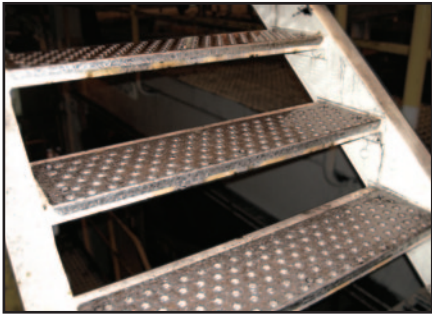

Tony Linke
Treasury Wine Estates

Other Satisfied Customers

BHP Billiton, Rio Tinto, Newcrest, Barrick Gold, Caltex, Shell, Onesteel, Santos, Sibelco, McWilliams Wines, Arnotts Biscuits and Viterra.

You may also like...

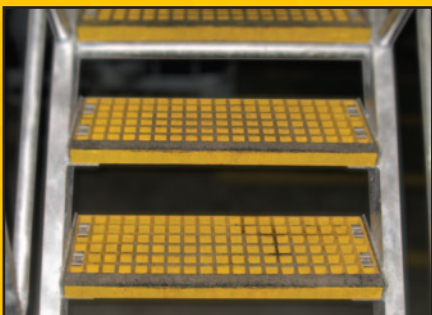

Lion Plate

Punched 2mm galvanised sheet, incorporating multi-directional 4 way cleats giving excellent anti-slip surface protection, guarding against slips, trips and falls on your steps and platforms.

Gripmaster

Our Gripmaster anti-slip products are recognised as the best in the world. No other product can attain the same level of aggregate hardness and density to maximise resistance to wear. Available for any steps, ladder rungs & platforms in any sizing for all environments – mining, oil rigs, abattoirs, food manufacturing, grain mills and agriculture.

FRP Grating

FRP Grating has excellent resistance to a vast range of corrosive chemicals, which makes it an ideal product for use in environments where rust, saline and acids are prevalent. Reinforced fibreglass plastic has incredible strength making it 1st choice for access walkways in heavy industry, mining and marine applications.
