Proof That These Orgonium Orgone Pendants Are Very Powerful

We are continuing doing constant Research showing the strength of Orgonium Orgone Energy & Schumann Resonance products and how they strengthen your Aura and balance your Chakras

Can You Afford To Be Without An Orgonium Orgone Pendant?

“The results shocked us! In the 15 years we have been testing such products, we have only seen this level of aura development in meditators or spiritual practitioners such as Swamis. We have tested many energy enhancers, shielding devices and crystals, but none have come close to the amazing effects of these incredible Orgonium Orgone Pendants”

Mathew Shields, Registered Nurse GDV Practitioner

How Does The Orgonium Orgone Pendant Give Us These Benefits?

- The secret combination of materials in the Orgonium Orgone Pendant acts as an energy charger or has a harmonising effect on the frequencies that make up the Aura.
- A Bio Resonance in which pure frequency acts to amplify a like but in harmonious frequency to allow it to become a whole.

Gas Discharge Visualisation (GDV)

How Does This Testing Work?

- The system is based on capturing and analysing the Kirlian effect
- The Kirlian effect is the biological glow that the body emits often referred to as the AURA
- The GDV system uses fibreglass optics, digitised TV Matrix and Powerful software to capture images
- The system capture images of the fingers it then calculates 30 parameters.
- These scores are then statistically processed to evaluate changes in health , psychological states and in therapeutic regimes

What Exactly Happens

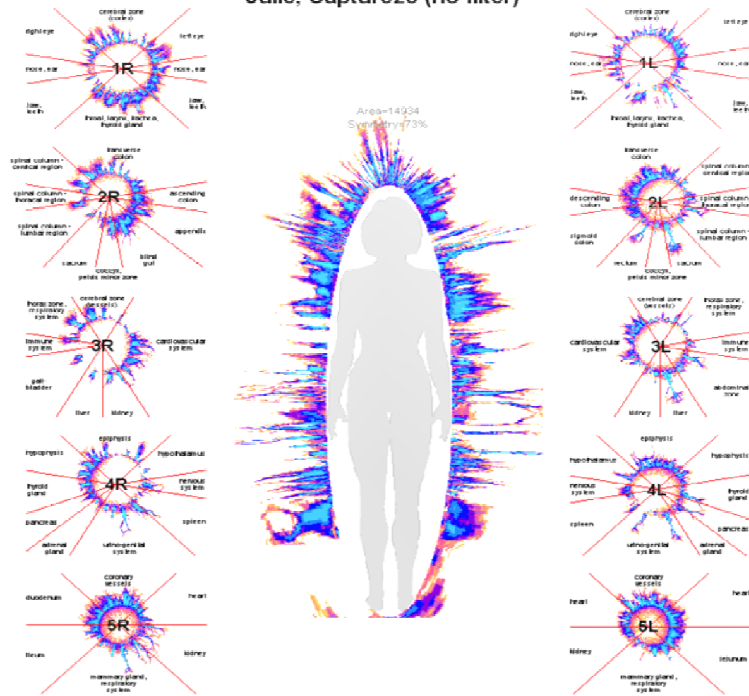

- Images called Biological Emission of Optical Tomography (BEO-grams) they are created when a high frequency field is emitted which causes the AURA to glow.
- The high frequency field is emitted and Ten fingers are photographed to get the BEO-grams
- Each finger represents a system , organ or chakra of the body
- The results from the ten fingers are analysed and produce an executive picture of the whole body.

Why The Finger Tips?

- The meridians of the body relate to the systems and organs of the body
- These meridians are represented in the hands and the fingers
- Extensive research has identified the organ or systems represented by each finger
- The GDV system measures over 30 parameters and scores them statistically to evaluate changes in health psychological states and also therapeutic regimes

The Research

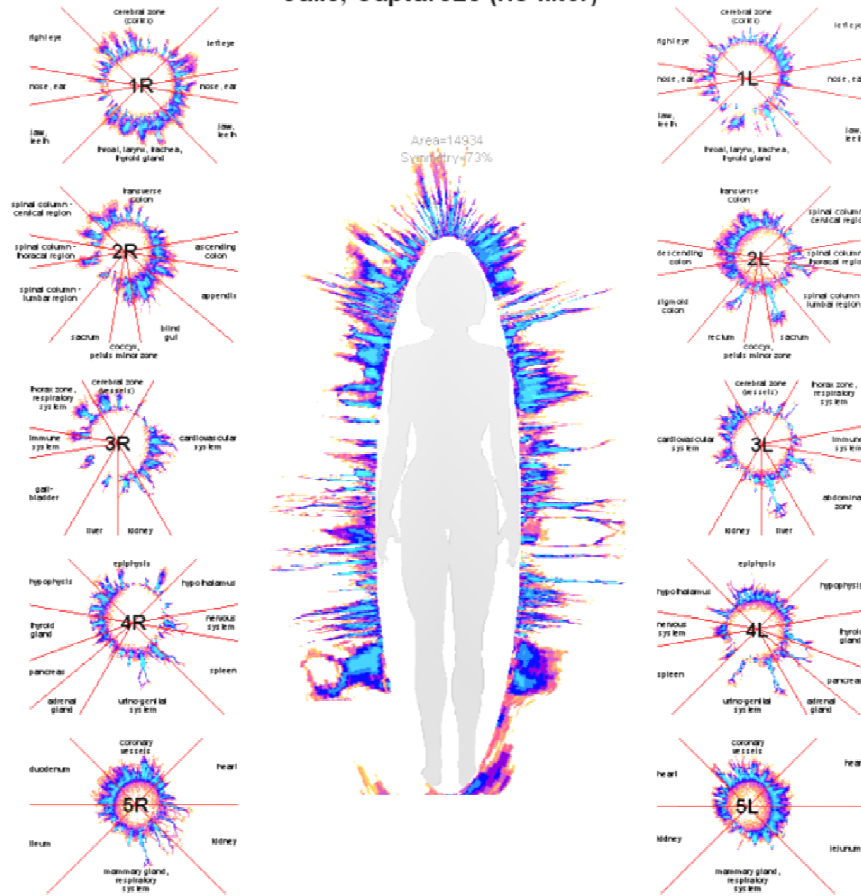

- The GDV system has been used to test the effects that the Orgonium Orgone Pendant has on the subject's aura.
- An Aura which is healthy has good symmetry, brightness and uniformity with the Orgonium Orgone Pendant being worn.
- This means the body is best positioned to fight disease.
- The immune system is activated.
- The images are presented in different ways but the same sequence:
- Image 1 is without the Orgonium Orgone Pendant being worn
- Image 2 is after wearing the Orgonium Orgone Pendant for 3 hours
- Image 3 is after wearing the Orgonium Orgone Pendant for 6 hours
- Image 4 is after wearing the Orgonium Orgone Pendant for 24 hours

The Chakras

- There is a sitting man on the left of the image
- There are seven circles
- The optimum position for the dots is that they are even and sit in a straight line
- The left side is psychological imbalance
- The right is physical imbalance

Normalised Energetic Values Of The Chakras

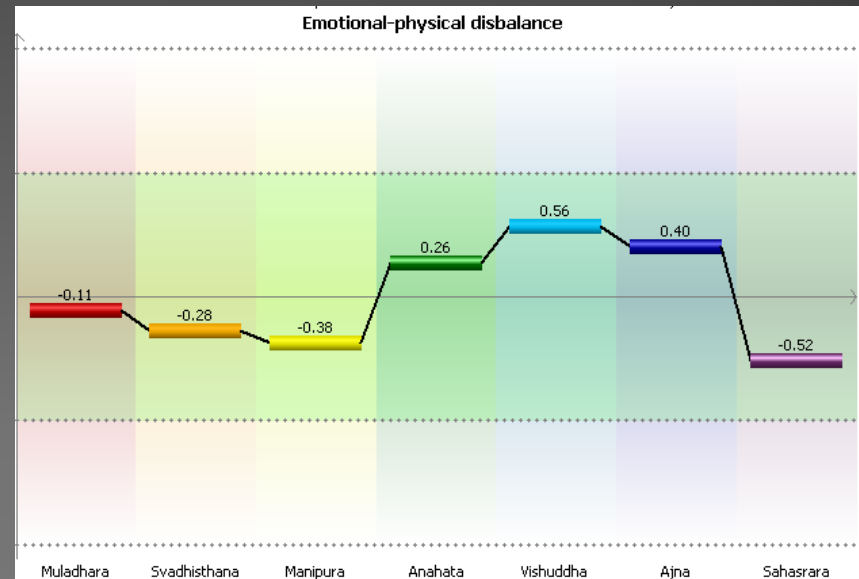

This is the amount of energy the chakra is emitting

- The green corridor is normal
- Readings above the line are over active
- Readings below are under active
- Where the line is the highest this is the most active chakra and the colour of the persons aura

Emotional & Physical Disturbance Of Chakras

- Above the green line the psychological imbalance
- Below the green line is physical imbalance
