Escalators - Travelators

A close-up photograph of an escalator step. A blue cleaning brush is positioned against the metal grating of the step. The background is a dark blue rectangle containing the Duplex logo and the word 'escalator'.

Duplex[®]

escalator

The range of escalator cleaning machines comprises machines that are able to meet all requirements for the routine and thorough cleaning of every type of escalator or moving walkway.

The Duplex concept means that the Escalator cleaning machines perform a deep sweeping action that removes solids that have accumulated in the grooves, thereby helping to keep escalators and moving walkways in good working order, and clean them thoroughly at the same time, significantly reducing cleaning times.
