

***FASTEST TURN-AROUND  
WITH QUALITY TO MATCH***

# PROVIDING QUALITY & RELIABILITY THAT YOU CAN DEPEND ON

## SWIFT METAL SERVICES

With confidence in the Australian manufacturing sector, Swift continues to invest in the very best metal stamping equipment to ensure we remain at the cutting edge of component and metal fabrication technology. Our continual improvement philosophy ensures that work methods and production processes are optimised for maximum efficiency. Staff training, including high proficiency in Lean Manufacturing techniques forms an integral part in Swift Metal Services ability to deliver efficient metal component solutions.

Swift Metal Services is a second generation component manufacturer who provides high quality service for companies with specific manufacturing requirements, Australia-wide. With clients in manufacturing, mining, tunnelling and major infrastructure sectors, we have a strong track record for supplying both manufacturer's production requirements and componentry for construction projects.

Swift Metal Services' in-house manufacturing facility is not only capable of producing quantities from 50 through to millions, but also has experience with materials ranging from mild steel and stainless steel through to aluminium, copper and PVC plastics.

Our in-house turnkey facility can implement design changes and developments to Australian Standards quickly — providing quality and reliability that you can depend on. This translates to fast, efficient service that meets your exact specifications as well as your deadlines for delivery.

## WE CAN PROVIDE

Swift Metal Services can provide the fastest turnaround with top quality results in the following areas:

- Metal pressing & stamping
- Laser cutting
- Punching
- Forming
- Machining
- Drilling
- Thread rolling
- Toolmaking
- Tapping
- Welding

Today the team at Swift Metal continues to exceed our customer expectations, through the delivery of the most comprehensive and reliable **component and metal stamping service in Australia.**

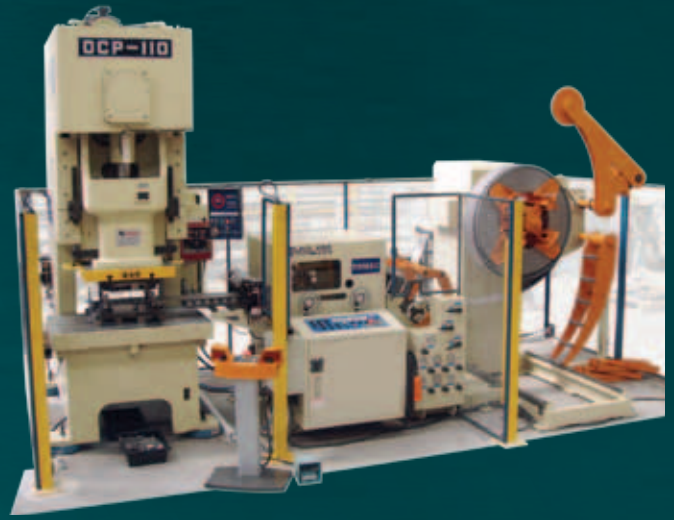

## THE SWIFT METAL SERVICES ADVANTAGE

- DIFOTIS Guarantee – Delivery In Full, On Time, In Specification.
- Every part is guaranteed.
- Free into Store deliveries Australia-wide.
- On time deliveries of planned stock is guaranteed.
- Cost efficient production methods ensure the highest quality and service at the best price.
- An agreed level of safety stock can be held to eliminate nil-stock situations.
- Your requirements will be attended to personally and promptly.

## ***METAL STAMPING & PRESSING***

At the heart of Swift Metal Services is our metal stamping & pressing capacity. With manual presses from 5 tonne capacity through to state-of-the-art, automatic coil fed power press, we have the metal stamping equipment to suit all your requirements.

Our commitment to staying at the cutting edge of technology means that Swift has the stamping & pressing machinery and experience to produce your pressed parts and stamped componentry accurately, quickly, precisely and cost effectively.

**When you engage Swift to press or stamp your components there are a number of benefits to you the customer, including;**

- **Breadth of Capacity** - Broad range of presses with varying shut heights, stroke lengths and table sizes.
- **Consistent components** - Fully equipped In-House tool room with qualified toolmakers for new tools and maintenance to existing tooling
- **Highest Quality** - Staff with extensive experience in all aspects metal stamping and pressing.
- **Optimum pricing** - Swift buying power for all metals including stainless steel, brass, copper, aluminium and steel combined with fastest run times on the best machines ensures quality and competitive component manufacturing.

**What's more, you get the benefit of technical expertise that our experienced and industry expert professionals possess. Our metal stamping & pressing technicians invest hours into constant research and development to make sure of maintaining and improving, the process and quality, of every aspect of our metal stamping and pressing operation Email [sales@swiftmetal.com.au](mailto:sales@swiftmetal.com.au) or Freecall 1800 626 525**

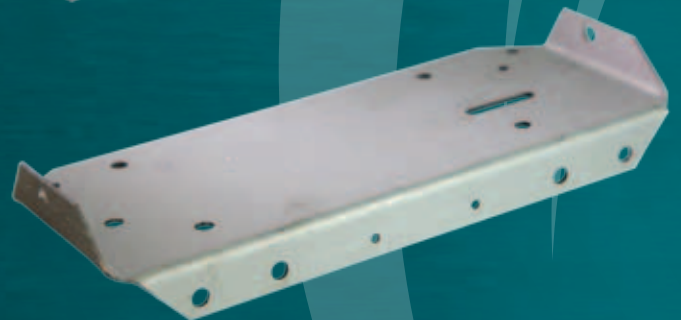

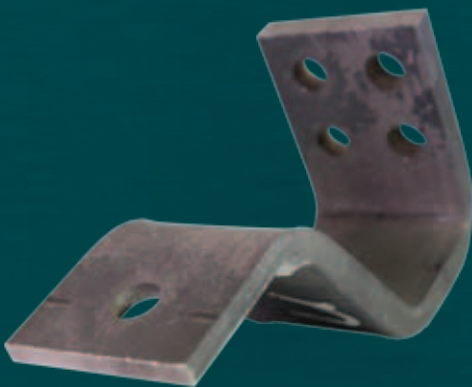

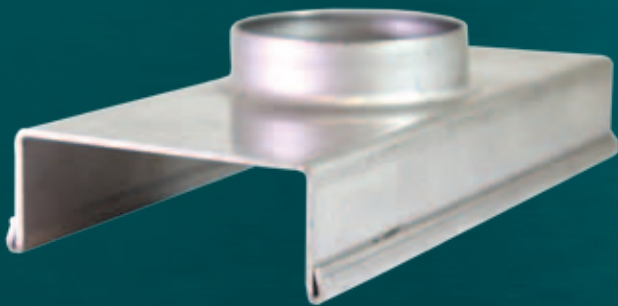

## ***FOLDING & BENDING***

With an array of folders and break presses through to 125 tonne 3 metre capacity, the folding and bending division of Swift forms an integral part of our overall Metal Services capabilities.

Accurate folding, bending and forming of light gauge material and sheet metal is often a vital element in component manufacturing.

**Using Swift Metal Services, our long term and new clients prove a number of advantages;**

- Latest technology bending and folding equipment as well as traditional machines.
- Multi-stage bending
- Precision forming of tight tolerance componentry

## ***TUBE BENDING & BAR FORMING***

Incorporated into Swift's metal processing equipment is a range of tube benders and bar forming machinery.

Forming, profiling and crushing of tube and bar into a proliferation of shapes, sizes and diametre's is an integral part of our ability to provide a complete component solution.

## ***THREAD ROLLING & MACHINING***

Combining in-house machining and thread rolling services with allied machine centers ensures Swift can provide the machining and rolling threads for a vast array of materials, pitch and thread sizes.

Specializing in minimum order quantities of 50 parts and up, our repetition expertise is evident in accuracy, quality, competitive pricing and class leading delivery times for thread rolled and formed components.

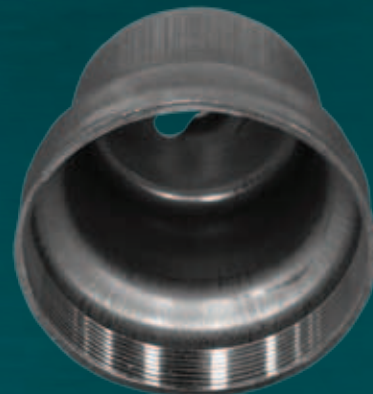

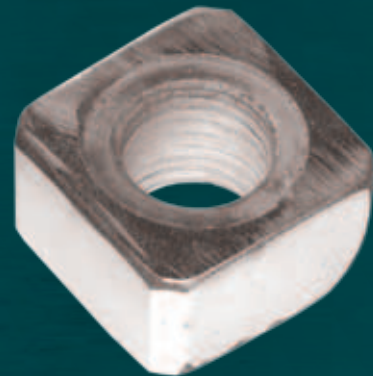

Our proficiency in component manufacturing becomes more apparent when producing multi-stage component assemblies.

## ***DRILLING, PUNCHING & TAPPING***

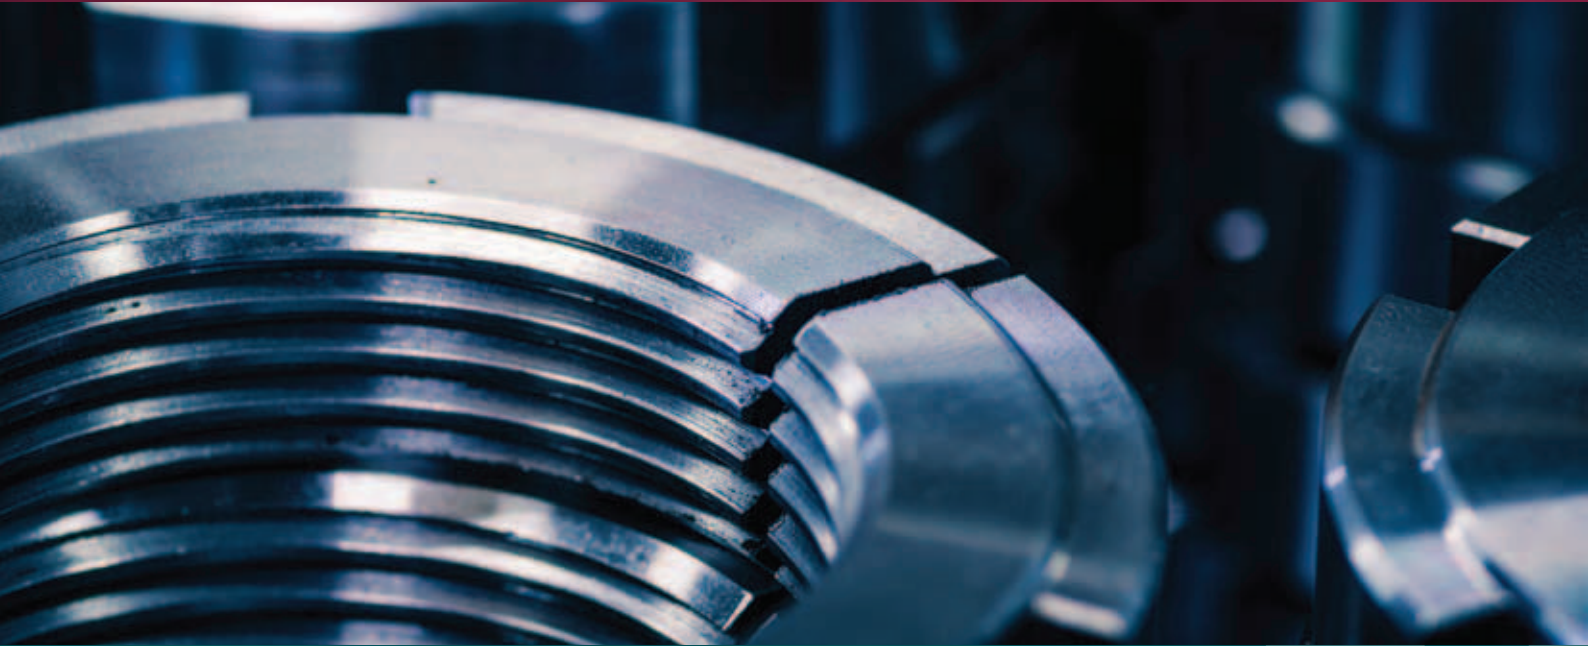

Complimenting our metal processing capabilities are the more mundane but essential services of drilling and tapping components or parts.

This includes punching of holes up to 76mm in standard punching machines and unlimited holes sizes with specialized tooling (produced in our in-house tool room). Tapping up to M24 thread sizes and larger sizes available with machining centres.

# ***SWIFT METAL SERVICES***

## ***WHY USE SWIFT METAL SERVICES FOR YOUR COMPONENTS AND METAL SERVICES?***

- Over 15 years of consistent service to Australian manufacturing and construction industries.
- Guaranteed quality – Your components are always in specification.
- Guaranteed lead times – Typically the fastest turn-around times in the industry.
- Free deliveries Australia-wide – No hassles Correct parts, On time, Every time.
- Cost efficient production methods ensure highest quality and service at the right price.
- Swift's buying power ensures lower component costs.
- Modern facility with latest technology machines and world-best practices.
- Trained and experienced staff.
- Committed to safest work practices resulting in a zero harm organization.
- Committed to minimizing our environmental impact with all material and packaging recycled through accredited providers and latest technology machinery minimizing energy usage.
- Family owned and operated with our success reflected in the input to local communities and charity groups including Royal Flying Doctor, Cancer Council, and SES to name a few.
