

Any Cap
Any Bottle
Any Line

High quality bottle cappers and cap tighteners for screw caps, lug caps and snap-on caps from 10 to 130mm in diameter. Dependable and long-lasting bottle capping machines that provide excellent repeatable torque accuracy. Designed and built in New Hampshire, USA.

HANDHELD

Various handheld solutions and options. Pneumatic and electric drivers available with torque range to suit any cap.

BENCHTOP

Benchtop solutions offer a mid range capping where a manual process is not practical for slightly higher volumes.

AUTOMATIC

Efficient inline automatic cap tightening solution for higher volume lines. Provides all the benefits of automation, yet remaining uncomplicated.
