

HTG

HIGH-TECH GENERATORS

EH1000 Digital Inverter Generator

The stylish design of the EH1000 inverter generator is ergonomically and mechanically engineered specifically for the serious Camper. The workmanship of EH1000 is exceptional and the quality and refinement will ensure total dependability over the lifetime of the generator.

Maximum power output 1000 watts , with a continuous load rating 850 watts. Unobtrusive noise levels, between 54-59DbA, (which is equivalent to a person having a conversation), makes this generator one of the quietest in its class.

The sturdy lightweight design of this inverter generator is only 16kg, and is easily moved around with the multiple grip handles specifically design to allow 2 people to safely lift and relocate the generator

WARRANTY

Your HTG Digital Inverter Generator has many features designed to ensure the operation is both, simple, safe and most importantly dependable. All HTG Generators come with 2 year parts and labour warranty for domestic use and 1year for commercial use & as an added bonus, warranty can be transferred to the new owners within the warranty period, thus maintaining the resale value of your generator.

Specifications - EH1000 Digital Inverter Generator

Dimensions and weight

Length × width × height	483×272×414(mm)
Dry weight	16 kgs

Engine

Model	EM143F
Engine	4-stroke, overhead valve, single cylinder
Displacement(Bore×Stroke)	53.5mml (43.5X36mm)
Compression ratio	8.5: 1
Engine speed	5400rpm (With SMART throttle switch OFF)
Cooling system	Forced air
Ignition system	Full transistor
Oil capacity	0.25L
Fuel tank capacity	2.3L
Noise	54-59 dB (@ 7 metres)

Generator

AC OUTPUT	Rated voltage (V)	240
	Rated Frequency (Hz)	50
	Rated ampere (A)	3.5
	Rated output (Watt)	850W
	Max output (Watt)	1000W
DC output		Only for charging 12V automotive batteries. Maximum charging output: 8.3A

PH:1300 743 526
