

Current Defence Telco Capabilities

- Defence Systems Integration
- Defence Systems Engineering
- Defence Software Engineering
- RAMS / Safety Engineering
- R&D – Automated Testing of Mission Critical Systems
- Integration & Test
- Defence Communications Systems - Engineering
- Defence Communications Systems - Design and Test

Noventus Systems Engineering, Integration & Software Engineering services are supporting key ATM projects

- Data Mining
- EMI/EMC
- Project Management Support
- Data Management
- Defence Mechanical Engineering
- Defence Integrated Logistics Support (ILS)

Key Defence Projects

- **JP 2072** – Battlespace Communications – Personal Radio Equipment Study – Defence Systems Engineering
- **JP 2048 (LHD) & JP 2097 (Redfin)** – Battle Management System (Data Communications & Situational Awareness) – Defence Systems Engineering & Mechanical Engineering
- **JP 2047** - Terrestrial Communications – ILS / Spares Modelling
- **Defence Secure Video Conferencing** – Project Management / Security Management
- **AIR 5397** - Australian Military Airspace Control Communications System (AMACCS) – Project Scheduling
- **IP Based Communications** – Business Analysis / Defence Systems Engineering for Ethernet Evolution, IPv6, & NBN Projects
- **IP Network Wireline Transformation Program** – FCA
- **Mission Critical / Vehicle-Based Multi-Bearer RF Communications System** – Business Analysis, Systems Architecture, Systems Engineering, Communications/Electronics Hardware Engineering (Voice/Data/GPS) (Satellite/3G/UHF/VHF)
- **ANZ International Super Regional WAN Deployment** - Business Analysis / Project Management
- **Automated Train Management System** - GSM-R Communications Based Signalling Project – Defence Systems Integration / Test & Software Engineering

Key Partners - Radixon - Noventus represents Radixon exclusively in Australia. Radixon provides software defined receivers, lawful intercept, monitoring, & surveillance products

Noventus provides ILS advisory services for Army Aviation

Noventus IP Network engineering services provides the core Control Systems building blocks

Noventus conducts Asset Management, Supportability & Engineering reviews for major Naval platforms

Why We Are Different

- Demonstrated client focus guarantees better outcomes and **superior value for money customised solutions**
- A successful track record delivering high grade & diversified engineering & integration advisory services with highly qualified consultants ensures enhanced capabilities
- “Real Time” mobilisation & deployment of small to large, **security cleared, multi-disciplinary teams** Australia wide
- A nation-wide network of trusted relationships with blue chip clients

The WD-3300 High Performance Direction Finders are exported to the US military to support Middle East operations

Key Defence Panels

- SEA 1000 Future Submarine Defence & Industry IPT
- Rapid Prototyping Development & Evaluation (RPDE)
- Defence Support Group (DSG) – Electro / Mechanical CAD Design Services
- Defence Materiel Organisation Support Services (DMOSS)
