PROVIDING EXPERTISE ON ALL THINGS SECURITY

The safe storage and dispensing of drugs to patients is of critical importance. As recent events have shown, unauthorised tampering with medical products, saline ampoules or saline bags can have lethal results.

Using standard keys to lock up such products is insecure and gives no record or indication of who had access to the drugs. SALTO electronic locks only allow access to authorised personnel, only at authorised times if required, and ALWAYS PROVIDE AN AUDIT RECORD of the user who accessed the lock and the date and time of opening.

SALTO wireless 
real-time access control

Quick and easy to install, it's an ideal solution to ensure only the correct people have access and only at the correct times.
