## Shade Sail Information Pack

### Introduction

**Shade Australia Pty Ltd** has been in the shadesail business for over 13 Years. Over that time we've been involved with thousands of shade sails and we'd love to help you turn your plan for a new shadesail into a successful reality. Before we do, there are some things you need to know about how we operate.

Essentially we are a DIY company. We offer you a range of tools in order that you can get the job done yourself in a professional way and, save a fortune in the process. We don't offer a measure quote or installation service.

### OPTION 1

One of the main tools we offer is the most comprehensive **Shadesail Installation Manual** written on the subject. If you're starting from scratch we recommend you pick up a copy of the book. It will save you from making many of the common mistakes people make when installing a shadesail for the first time. We offer a **SPECIAL DEAL**, pick up a copy of the book and if you buy a shadesail we'll refund the price plus give you a special deal on Stainless steel hardware.

The manual along some FREE Shadesail Guides and videos are available here. Take a moment to review the information at: <http://www.diyshade.com.au>

### OPTION 2

If you already have the attachment points in place and all you want is the custom made shade itself then you're in the right place. What we need are the **point to point measurements**. You can download the measuring charts from our website. Go to this page: <http://www.shadeaustralia.com.au/shade-sails/custom-size-shade-sails> and under the **TECHNICAL TAB** you'll find the measuring charts you need to make the job easy. You can also watch a video on how to take the measurements.

Once you've got the measurements, fax or email them to us and we'll do the rest.
