Medix™ Integrated Pro-Split Cup (with Adulterant tests) - a rigorous and affordable workplace drug testing solution aligned to Australian standards

The Medix™ Integrated Pro-Split Cup offers an advanced split unit design and an adulterant testing strip for greater analytical capability. This enables a segment of the test sample to:

- be directed to an antechamber with a built-in thermometer to determine whether a sample is recently collected or “fresh”;
- to test for the following additional contaminants:

- Creatinine
- Nitrite
- Gluteraldehyde
- pH
- Special gravity
- Oxidants
- Pyridinium chlorochromate

CMM Technology™ offer free online training: we have developed an online product certification program for our clients to use with this product so that you can rest assured your staff are fully conversant in the use of this device.

Key Product Information:

- One-step - no urine handling
- Currently tests for the AS4308 drugs of abuse (but can test up to 10 drugs)
 - Amphetamine
 - Benzodiazepines
 - Cocaine
 - Methamphetamine
 - Marijuana (THC)
 - Opiates
- Manufactured to meet AS4308 cut-offs
- Test starts when the collector is ready (not when the subject gives the specimen)
- Built-in thermometer
- Easy open/close no-leak container
- Recording space on unit (donor information)
- Only 25ml of urine is needed (NB: for sample confirmation, only 3.5ml is required to actually run the test)
- Splits the instant test sample from the main laboratory sample
- Security seal supplied
- Read results in just a few minutes
- Photocopy the results
- Cost-effective
- Kits can be tailored to suit your specific requirements
- Effective in-field drug screening and urine testing solution to minimises the impact on workplace operations.
