

[Orthoclinic Specialist Orthodontics](#) are Canberra's leading Orthodontists as we offer a number of orthodontic services that can help you achieve your best smile.

Located in Manuka, ACT, we have a team of orthodontic specialists that are highly qualified and committed to oral health. We provide orthodontic care to adults and children.

Upon having your first examination with our orthodontist, he will assess and identify issues and then decipher what treatments would be best suited to you. Then the orthodontic treatment will start.

Our Orthoclinic facility is custom designed to allow us to provide the best in patient care. We use advanced technology and orthodontic techniques.

We have 4 braces options available and also have other types of orthodontic treatments too. Our friendly team of Orthodontists, Coordinators, Administrators and Dental Hygienists are welcoming and informative. Any questions you have about your treatment can be answered in a flash.

We have a number of treatments available of adults, teens and children. Some of which include:

#### **Treatments for Adults**

- Braces
- Invisalign®
- Incognito™ lingual braces
- Six month braces
- Surgical orthodontics

#### **Treatments for Children & Teens**

- Children & Teens
- Braces
- Expanders
- Space maintainers
- Plates
- Early preventative treatment

Because our teeth never stop moving, we also offer dental retainers that are typically worn after treatment has ended. These retainers ensure that your results are maintained.

Whether you require treatment for a younger member of your family, or you are an adult seeking great results, the Orthoclinic team can help you.

Once your treatment is completed you will be left with a beautiful bright smile.
