

[Instant Transportable Offices](#) are a WA based manufacturer of portable building designs. With over 40 years of experience in the industry, Instant Transportable Offices have a wide range of knowledge and understanding of both construction and design. We offer building solutions that will help you work safer, faster and easier!

Here at Instant Transportable Offices, we believe that success is really about working smarter not harder. Our portable offices can help you do just that! A portable office can easily be transformed and shaped to suit your needs. Many of our clients use our designs as onsite office spaces, however, they can also be made into washrooms, toilets or even converted into an additional room for your home. Our designs are personalised to suit your needs and can be manufactured in as little as one week! I guess you could say that we really are *instant*!

### **The 'Instant' Process**

Scott Rawson, General Manager at Instant Transportable Offices, uses his experience in project management and dedicates his time to all areas of the manufacturing process. The first step in our process is planning, where you will sit down with one of our specialists and talk about the reasons for needing a portable office. This way, our team can find you the perfect fit and start designing! We then manufacture and construct the necessary parts and work with approval management, to then have your portable office installed onsite! Our team are not only experienced and professional, but we are 100% committed to you and your needs.

### **Financing**

Owning your own portable office is more affordable than you may think! We have multiple avenues of finance depending on your needs. Instant Transportable Offices will work with your budget, not against it.

Either purchase outright, hire or lease your portable office. Have a chat to one of our finance specialists who can guide you towards your best funding options. We can help you own your own portable office in no time!

Design, build and deliver; it's that simple! Call Instant Transportable Offices today or visit our [website](#) for more information!
