

According to Gartner, 80% of software spend is within the datacentre, so control of this expenditure is vital. With AssetStudio for Oracle, you can automate management processes to maintain compliance, avoid risk and prevent overspend for your Oracle software

Why do you need an enterprise solution?

Oracle licensing rules are notoriously complex and the vendor is consistently within the top 5 vendors likely to audit. So, it makes sense to pro-actively manage the software in order to drive the best possible value, control the risk and be able to respond readily to audits and avoid significant unbudgeted costs.

Because Oracle software is easily available to just download and use, organizations have a risk that there may be unknown and unauthorized instances on their estate. These would still need to be appropriately licensed along with the known, managed estate.

Category	Licensing Metric	Business Purpose	Licenses	Installations	Used	Minimum Licenses Required	Excluded Installations	Excluded Licenses	Variance
Active Data Guard	Universal Power Unit	Production	45	0	0	0	0	0	+45
Diagnostics Pack	Named User Plus	Production	50	1	50	50	0	0	0
Diagnostics Pack	Processor	Production	20	2	1	1	0	0	+19
Enterprise Edition	Named User Multiple	Production	0	1	0	1420	0	0	-1420
Enterprise Edition	Named User Plus	Production	0	1	0	50	0	0	-50
Enterprise Edition	Processor	Production	95	1	1	1	0	0	+94
OLAP	Named User Multiple	Production	0	1	0	1420	0	0	-1420
OLAP	Named User Plus	Production	0	1	0	50	0	0	-50
OLAP	Processor	Production	0	1	0	1	0	0	-1
Partitioning	Named User Multiple	Production	0	1	0	1420	0	0	-1420

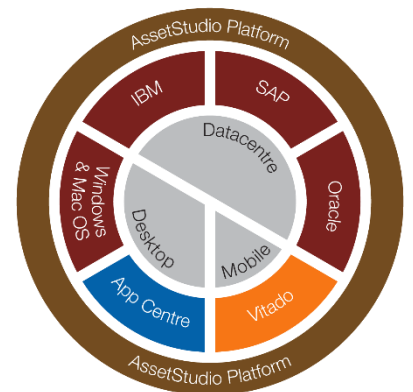

Complete visibility of Oracle software

There are many organizations that unintentionally breach their license agreement due to a lack of knowledge of their applicable license terms, lack of license management internally or via a 3rd party, or a lack of control over the distribution of the software within their organization.

AssetStudio for Oracle help mitigate these circumstances and is designed for organizations that want complete visibility and control of all Oracle instances on their estate. It can seamlessly integrate with other products on the AssetStudio platform to provide a holistic solution, or it can be used alongside a third-party product as a stand-alone tool.

Benefits

- ✓ Reduce audit exposure by ensuring you have accurate visibility of your Oracle estate
- ✓ Built-in automation to handle licensing for virtual instances
- ✓ Automate processes and mitigate risks
- ✓ Stand-alone or complementary product that can enhance any existing tool

"The AssetStudio modules have been designed to be best-in-class at their particular function.

Joined together, they really do add an extra dimension to its capability, which is great for us given our size and complexity."

Simon Warrington - VP of IT,
LINPAC

About Certero

Certero are a vendor and supplier of products and solutions for: Software Asset Management (SAM), Software License Optimization and Entitlement (SLOE) and IT Asset Management (ITAM). Complimented by tailored services, our mission is to provide the best solutions that work individually and holistically together, seamlessly and optimally on a single platform.

Key features

Easy reporting

- Set alerts, create and share knowledge easily with the integrated Acquaintia reporting engine.
- Advanced Oracle discovery identifies all current instances, providing the evidence needed to prove that no software has been missed.
- Ensure your inventory is accurate and Oracle instances are known.

Automate the license reconciliation process and control risk

- AssetStudio for Oracle provides built-in intelligence on all of the complex Oracle licensing rules, entitlements, options and management packs.
- Enables the reconciliation process to be automated, helping to quickly establish a safe and trusted Effective License Position (ELP) for the database layer.
- Identifies any potential risks and maintains a constant view of compliance, with minimal management overheads.

Built-in automation for all virtual instances

- AssetStudio for Oracle automatically identifies and reports when new Oracle instances are deployed.
- Gives the organization the ability to manage changes and mitigate risk against un-budgeted costs to the business.
- The system offers extensive platform support, for Sun Solaris, Linux, Windows, HP-UX and IBM AIX
