

Genesis Building Services Pty Ltd first traded as Advanced Roofing back in 1988. Their vast experience in the roofing, ventilation and skylight market has allowed them to present the very best products from Australia and around the world.

Genesis provides free quotations on all types of commercial and residential roofing works. They also specialise in providing ongoing maintenance solutions to reduce faults and greatly improve the life expectancy of any roof. Genesis are also approved suppliers and installers of the huge range of solar powered skylights by Kimberley ILLUME solar powered Skylights.

Cleaning the roof and gutters of all buildings is essential at least once a year. Insurance companies can refuse claims if proven there were large amounts of flammable debris on a building's roof. Genesis Building Services include a free comprehensive roof and gutter report that provides cost estimates and photos so that customers can get further independent quotes and compare.
