

IDC Technologies – Instrumentation Courses

IDC wants to be your life-long partner in your technical career, helping you to keep up-to-date with your engineering and technical skills to be as productive as possible in your work. [IDC Technologies](#) specialises in engineering training courses in the field of Instrumentation, Process Control, Industrial Data Communications & Networking, Information Technology, Electronic Engineering, Electrical Engineering, Mechanical Engineering, Finance and Project Management.

IDC Technologies was founded in 1992 and have built a strong reputation globally as a provider of practical and technical training across a wide range of engineering disciplines. The success of our technical engineering training workshops and courses is largely attributable to the enormous investment IDC puts into continuously reviewing and updating the training materials that we deliver to our clients. Furthermore, we employ training instructors who are highly respected professionals in their fields of endeavour from all over the globe.

Our workshops and engineering short courses are not academic; they are designed to provide practical skills and hands-on applications where delegates are given the opportunity to apply, in practice, the theory they have learnt through our engineering courses. Contact the team at IDC technologies to enquire about the latest engineering training courses today.

Training Offered

IDC Technologies is an international accredited engineering and technical training company headquartered in Australia.

Our courses, workshops, and books cover:

- Instrumentation
- Process Control
- Industrial Data Communications & Networking
- Information Technology
- Electronic Engineering
- Electrical Engineering
- Mechanical Engineering
- Finance and Project Management

If you want to keep up-to-date with the skills needed in your career, look no further than [IDC Technologies!](#)
