About us

Sore backs, aching necks and tight joints are all too common, but have you ever considered that your feet might actually be giving you these problems? Thankfully, the team at [Airflex](#) are here to help! Our brand was established under what is now known as the Betts Group in 1892, with the aim of providing all men and women with the most comfortable, durable and stylish shoes Australia has to offer. Here at Airflex, we are constantly researching and innovating new designs for extreme comfort, an ethos we believe is paramount to our business. Our comfortable shoes exceed our customers' expectations every day and make work and life a more enjoyable experience.

Shoe technologies

Everlite: The Everlite technology focuses on making shoes light, durable and comfortable. Our Airflex shoes embedded with this technology enables users to enjoy shoes that are at least 25% lighter than other brands. Lighter shoes mean that your feet are carrying less excess weight, reducing stress and pressure so they feel less tired at the end of the day. The Everlite technology ensure that you can be quick to get back on your feet!

Ultraflex: Need to be light on your feet? Our Ultraflex technology utilises high tech outsole materials that maximise shoe flexibility. This shoe fits you, not the other way around, and promotes natural foot movement whilst reducing foot fatigue.

Energy Pod System: This system is shock absorbent and works by placing a pod in the heel region where the impact to the ground is the greatest. When your foot hits the ground the shock is absorbed and evenly dispersed, leading to reduced stress on the foot and ultimately less stress on the entire body.

The Benefits of Airflex:

Flexifit: Our shoes are built with a removable sock, allowing for a wider fit and the use of orthotics. Our advanced leather memory foam insoles give your feet a break and provide the highest level of comfort and protection. Now you can be comfortable and know that your feet are getting the best treatment possible!

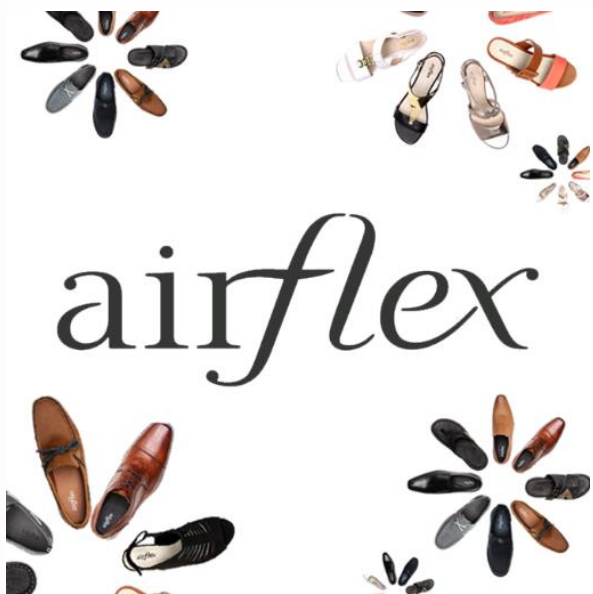

Xtreme comfort: Don't let your shoes put you in a bad mood! Our Airflex range are designed to increase shoe breathability whilst maintaining comfort and durability.

Signature series: The style and design of all our shoes are made to ensure that you have the most comfortable and stylish shoes on the street. They are made to adapt for each foot without compromising style, reducing foot stress and helping you feel confident!

We raise the bar when it comes to stylish, durable and comfortable footwear.
