

TUDOR TIMBER

[Tudor Timber](#) have been timber specialists in WA for over 25 years. Tudor Timber specialises in timber decking, timber screening and timber cladding for WA businesses and home owners. They import the timber directly and have a factory in Kelmscott to have control over quality and offer innovative products at competitive pricing.

Timber is the perfect choice for connecting indoors and out, whether through continuing a timber flooring into decking or running an interior timber clad wall into the exterior. Timber screening is also becoming increasingly necessary and sought-after in our high density sub-divisions and urban backyards. Their timber screens provide the ability to create a useable, multi-functioning backyard; provide hanging and growing space for contained and/or vertical gardens; and hide unsightly utilities, neighbours and fences.

Tudor Timber also supplies a range of hardware to meet your DIY decking and screening needs, making them your complete decking and screening shop.

View below the range of timber options from Tudor Timber:
