Cost Effective Boardwalks & Walkways

Designed and engineered by experts for ease of installation, extended life and low maintenance.

- ✓ Coastal
- ✓ Fixed
- ✓ Floating
- ✓ Inland
- ✓ Waterways
- ✓ Parks
- ✓ Marina jetties

PermaStruct bespoke boardwalks are designed and constructed to suit all environments.

PermaStruct low maintenance boardwalks are also ideally suited to remote, harsh locations where access and maintenance is an issue. Our boardwalks are supplied in a variety of textures, materials and colours to match environmental needs.

Easy installation is achieved by using our non-invasive foundation techniques which is particularly important in heritage areas.

Utilising the trademark Diamond Piers foundation we can successfully complete installation without affecting the surrounding areas.

Confidence with every step

PermaStruct

• No.1 for FRP •

Landings - Platforms - Look Outs

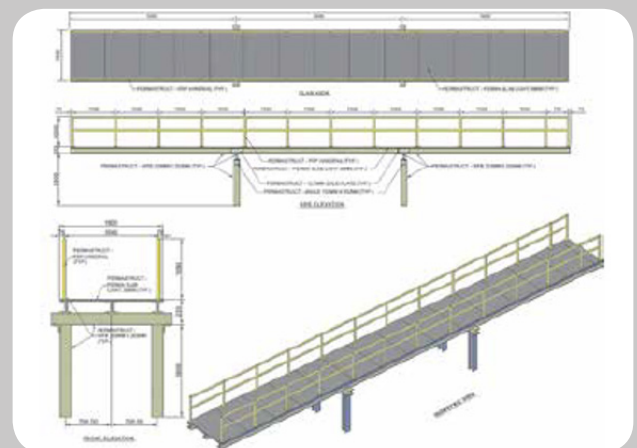

Sleek, modern, & capable of withstanding harsh environments.

PermaStruct delivers a lightweight, high strength and low maintenance boardwalk solution.

PermaStruct FRP Bridges are designed to accommodate high loads and fatigue, making it the ideal low maintenance choice for bridge structures - whether single or multi span.

Individual bridge designs can be accommodated by our in-house design team, who have many years of industry experience.

Entire bridge structures can be manufactured using PermaStruct FRP, or we can marry with existing timber, steel and concrete infrastructures - resulting in a cost effective upgrade of existing bridge.

- ✓ Simple & quick to install
- ✓ Perfect for remote & wetland locations
- ✓ Unique modular system
- ✓ Low maintenance, looks great in any colour
- ✓ Long life and lightweight
- ✓ Reduced installation costs

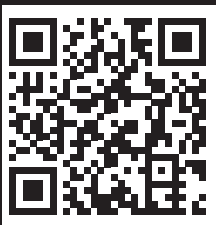

Diamond Piers.
Low impact construction
without excavation.

The engineered solution for solid
foundations without disturbing sensitive
and heritage environments.
