

Get an Extreme Clean with Bio Steam's Snoopy

The **Snoopy** is a **durable, robust and powerful cleaning solution** that uses dry vapour steam and state-of-the-art equipment to give your toughest cleaning challenges an extreme clean. Snoopy is the **most compact** stainless steel bodied machine available **anywhere**, and it has the ability to be dismantled from its trolley **to** squeeze into many tight spots. The Snoopy's 7 bar of pressure is outstanding for a machine of this size. Not just meeting - but exceeding - all HACCP and food regulatory requirements, the Snoopy's unique equipment is proven to give you the highest levels of sanitation and hygiene possible. **Floors, kitchen equipment, grouting, walls, ceilings, bathrooms and windows** will be quickly, easily and reliably cleaned and disinfected.

How does it work?

Specialised cleaning tools help dry vapour steam molecules penetrate even the smallest pores, **killing bacteria** and **forcing dirt and debris to the surface** – without any chemicals! When an extra cleaning boost is needed, a small amount of food-safe detergent is injected to **suspend the dirt**. Dirt and debris are vacuumed away, leaving **slip-free, instantly dry, sanitised surfaces**.

What are the benefits?

- ✓ **Exceed** HACCP and all food hygiene requirements
- ✓ **Reduce cleaning time with quick-dry surfaces**
- ✓ **Eliminate** detergent build-up for slip-free floors
- ✓ **Save** money on water and chemicals
- ✓ **Increase** the efficiency of your staff- no more mop and buckets
- ✓ **Be** environmentally friendly

Who does the Snoopy suit?

The Snoopy is the most versatile professional equipment available, and can be taken off its trolley within 2 minutes to produce a very compact steam only machine. It is suitable **schools, small hotels and restaurants, fast food outlets, butchers, bakeries** and **nursing homes** – in fact anywhere requiring efficient cleaning and sanitising

Technical specifications	
Steam Pressure	7 bar
