FIRE
PITS

WWW.ADANNA.COM.AU

While most fire pits are made from pressed steel, these market-leading, outstanding quality fire pits are made from eternally strong cast iron.

WHY CAST IRON IS A GREAT CHOICE

- ✓ **Strong & Solid** - Our Cast Iron Fire Pits are strong and thick (up to 8mm) and will not burn through.
- ✓ **No Weak Spots!** – Cast Iron Fire Pits have no weak points or welds, which means it won't rust through and crack with exposure to high temperatures and moisture.
- ✓ **Last a Lifetime** – Cast Iron Fire Pits have great durability, owing to its solid construction & great corrosion resistance.

Our fire pits are constructed with genuine cast iron to ensure that they stand the test of time.
