1325 ATC CNC ROUTER

Technical specification for MBT 1325 ATC CNC Router

- Working voltage 380V, 3 phase, 50/60HZ
- Working area (X, Y, Z Axis):1300mm*2500mm*200mm
- Industrial heavy duty double layer nesting frame.
- Highly Efficient Taiwan Helical Rack Gear transmission, X, Y axis Rack and pinion, Z axis Taiwan TBI Ball screw.
- Taiwan 25MM square guide rail for x,y,z axis.
- 1500W pure Servo motor and driver System.
- 11KW Fuling Inverter and 3 sets Japan Shimpo reducer.
- Auto tool position sensor.
- 4.5k - 12kW HQD Air Cooled / Water Cooled spindle specialized for auto-tool changer.
- Carousel movable 8-12 pieces movable ISO30 auto tool changer magazine
- Vacuum & T-slot combined working table with 8 pcs control valve and 7.5KW low noise vacuum pump
- 4 bags Auto Dust Collector with double bags and secondary dust removal device
- Taiwan control system with hand wheel
- Auto Lubrication for transmission system
- 8/10/12/14 sets Auto-tool changer holders, Cutters and Collets, 1 sets Qing bottom knife
- 20 sets woodworking tools
- Built-in control cabinet
- Safety curtain

1325 ATC CNC ROUTER

We can design, produce accessories, produce complete machine. We have professional workers to provide you with the best OEM production.

The core electrical components are located in the integrated control cabinet at the front of the equipment, which greatly saves the floor space. The sheet metal design is reasonable, and the debris is not easy to enter the inside of the control cabinet.

This machine can cut and engrave Wood/MDF/Soft Metal/PVC/Plastic and all common materials.

Power support 2.2KW/3.5KW/4.5KW/6KW and other power, suitable for the international standard ISO and F63.

Brand support Italy HSD, China HQD, LNCS and any other brand.

Motor types are optional: Stepper Motor or Servo Motor

Motor brands are optional: Yaskawa, Panasonic, Fuji, Delta, Leadshine.

We provide our customers with the most diverse choices.
