

Reliable WiFi & Network Support – Commercial Tenancies, Factories & Warehouses

Hello,

I'm Ben Ilett, Director of I-LETT.

We support commercial buyer's agents, leasing agents, and property managers with fast, reliable WiFi, network, and security setup for factories, warehouses, and commercial tenancies.

We're commonly engaged for tenant changeovers, legacy system resets, and network upgrades, ensuring sites are operational, secure, and tenant-ready from day one.

What we handle

- Commercial WiFi AP installs and optimisation
- Reset and reconfiguration of existing tenant networks
- Secure removal and building repair from legacy configurations
- Large-area WiFi design (high ceilings, machinery, racking)
- All-in-one UniFi systems (WiFi, switching, cameras in one app)

Why agents use I-LETT

- Lifetime workmanship guarantee
- Fully insured works (including cover for accidental property damage)
- WiFi channel optimisation (prevents drop-outs & interference)
- Emergency call-back within 1 hour (first month)
- On-site response within 2–4 hours, (when required)
- Monthly network & cyber-security email reports (optional)
- Ongoing off-site optimisation (reduces call-outs)
- Free annual security camera cleaning and waterproofing & WiFi diagnostics on UniFi systems
